

YOUR ORGANIZATION CAN'T AFFORD AN UNTRAINED IT WORKFORCE

Build a stronger IT workforce with hands-on training.

Hands-on labs, PBQs, awareness training, certification prep, and measurable readiness for your entire workforce. Most teams onboarded within 24 hours, with role-specific paths for IT, security, cloud, and every employee in between.

100,000+ PROFESSIONALS TRAINED	500+ LABS & PBQS	50+ CERTIFICATION PATHS	98% LAB UPTIME
--	----------------------------	-----------------------------------	--------------------------

THE COST OF DOING NOTHING

\$4.88M

Average cost of a single data breach (IBM 2024). Most start with an untrained employee.

68%

Of breaches involve a human element, phishing, misconfig, weak passwords, or stolen credentials.

1,265%

Increase in AI-powered phishing attacks since 2023. Traditional filters can't keep up.

\$50K

Average cost of losing one IT employee. Untrained teams churn faster and stay longer to get productive.

Five reasons untrained teams **cost you money.**

Every gap on your team shows up somewhere on the balance sheet, in fines, breach costs, replacement hires, or missed productivity. Here's exactly where it leaks.

1 Compliance failures are expensive

HIPAA, PCI DSS, and SOC 2 violations result in six- and seven-figure fines, lawsuits, and reputational damage you can't undo with a press release.

Risk: 6-7 figure fines

2 Turnover drains your budget

IT pros leave organizations that don't invest in their growth. Structured learning paths and certification support boost retention and slash replacement costs.

Up to 48% lower turnover

3 Slow onboarding kills productivity

New hires without hands-on training take months longer to ship. Role-aligned labs and learning paths get them to productive output in weeks, not quarters.

60% faster onboarding

4 Your team isn't ready for AI-era threats

AI-powered phishing, deepfakes, voice clones, and shadow AI are evolving faster than most teams can keep up. Continuous training stops threats before they escalate.

Fewer successful attacks

5 Cloud migration without cloud skills

Teams moving to AWS, Azure, or GCP without proper training misconfigure services and introduce vulnerabilities. Hands-on labs prevent costly mistakes.

Stop misconfig at the source

6 Audits become fire drills

When training isn't centralized and trackable, every audit cycle turns into scramble mode. Manager dashboards prove readiness on demand.

Audit-ready every quarter

THE SOLUTION

One platform. Six outcomes that **move the business.**

Faster onboarding

Role-aligned paths for networking, cloud, security, and IT fundamentals. New hires hit the ground running.

Certification success

PBQs, practice exams, and labs aligned to CompTIA, ISC², ISACA, AWS, and Azure. Pass on the first attempt.

Security awareness

Phishing sims, AI safety modules, and compliance training. Every employee learns to spot and report threats.

Cloud & infrastructure

AWS, Azure, Linux, Windows, networking labs that mirror production. Engineers get hands-on with real environments.

Skill gap analysis

Dashboards with progress tracking, domain-level skill insights, and at-risk employee alerts.

Retention & growth

Investing in training keeps talent longer. Employees stay where they grow.

The math is simple.

Compare the cost of one breach, one failed audit, or one early-leaving senior engineer to the cost of training your entire team for a year. The ROI isn't close.

48%

Lower turnover

Companies that invest in training keep talent longer and cut the \$50K-per-employee cost of replacement.

60%

Faster onboarding

Role-aligned labs cut time-to-productivity from quarters to weeks.

24 hrs

To go live

Most teams fully onboarded the day after kickoff. No long implementation cycle.

MOST POPULAR

Enterprise IT Training

\$25

per employee / month, billed annually

- ✓ Full IT training catalog + virtual labs + PBQs
- ✓ Practice exams for 50+ certifications
- ✓ Manager dashboard & progress tracking
- ✓ Guided onboarding & custom rollout plan
- ✓ Quarterly readiness reviews & reporting
- ✓ Priority support & dedicated CSM
- ✓ Role-based learning path customization

Multi-year plans save up to 20%. Invoicing & POs supported.

AWARENESS

Team SAT

\$30

per employee / month, flexible monthly billing

- ✓ Security awareness training modules
- ✓ Phishing simulations & recognition training
- ✓ AI tool safety & shadow AI awareness
- ✓ HIPAA, PCI DSS, GDPR, SOC 2 compliance
- ✓ Incident reporting & response basics
- ✓ Manager dashboard & progress tracking

10% off months 13–24 (\$27/employee/mo). Any duration.

No risk to evaluate

Free demo labs. No credit card. No obligation.

Procurement-friendly

Invoicing, POs, and annual billing supported.

Built for scale

5 to 50,000+ employees. Custom enterprise quotes.

SSO & LMS ready

Single Sign-On and LMS integration included.
